January 1956 plant of month

"ATOMIC PINK" - We have named this our first plant of the month because of popular demand and limited amount of stock. Atomic Pink description, full round pink flower, petals of flower tipped with deeper shade, good deep green quilted foliage. This is a new creation in a single pink. National African Violet Society blue ribbon winner of 1955.

Each month we are going to introduce a new outstanding variety January 1956, February 1956, March 1956 and on on, of course each will have a name. Included in these for early spring will be our double pink girls. Separate description will be given on each. Stock will be limited as we are going to propagate heavy on any variety because of immediate demand on the various varieties. No leaves or rooted cuttings sold. They will all be \$2.00 each with an order, sold separately please include 50¢ extra for packing and shipping.

Advance announcement of our plant of the month for February. None of this variety for sale until after February 1st, "FROSTED MADONNA" February plant of month. This will make one of the most outstanding varieties in your collection of today in foliage, being unlike any other of the albino in characteristic, semi to double white flower which is especially attractive with its' very silvery light green girl foliage. The veins and petals are pure white. The white veins in the leaves are of a white transparency effect. This foliage holds this color the year around in our greenhouse and propagate true.
